

Year 9 Home Learning MUSIC Tasks

If you are lucky enough to have your instrument at home – use this time to practice and develop some new skills. You can find good tutorials on YouTube for most instruments, and you can also download karaoke versions of songs to rehearse with!

If you do not have your instrument at home, here are some musical activities to keep you up to speed!

Activities:

1. Listen to some famous players of your instrument (remember that singing counts as an instrument!)
2. Try your hand at being a talent scout – look for some undiscovered music talent and find the next Billie Eilish. You can search Youtube for self-releasing artists, or you could also look at web pages like Sound Cloud.
3. Do lots of singing! It helps be a better musician – even if you are a guitarist or drummer it develops rhythm and pitching ability!
4. Ask your parents or carers for their favourite songs when they were your age – take a listen and see how things have changed over the years!
5. Learn a new song and record it into a mobile phone (if you have one). Then use props in your house and garden
