Testing & Evaluation

Learning Outcomes
- Be able to come up with a test (or tests) to see how successful your product is
- Be able to evaluate the finished product and suggest ways in which the finished product could be improved
- Be able to evaluate skills learnt in the project

TESTING- How can I test to see if my finished product works well?

_____

_____

_____

_____

TESTING- What were the results of the test?

_____

_____

EVALUATION- How good is my product? What is good about it? What could be improved? Does it meet the original brief? Does it meet the points in your specification?

_____

_____
